The Arlington Portable Range.

CHILSON'S New Range, 1872.

The first sight of this new and splendid Portable Range will convince all that its equal has never been seen, — in its Beautiful Design, Superior Fine Heavy Castings, with and without Hot Closets, and Reservoirs; also, Hot Water Fronts for Bath Boilers, Sifting Grates, Ash Pans, etc.

Housekeepers will be pleased with this PORTABLE RANGE.

CHILSON'S CELEBRATED AND UNRIVALLED BRICK AND PORTABLE FURNACES.

Ten Sizes.

Patented in the United States, England and France.

The high reputation this furnace has acquired, in the use of more than twenty thousand, places it preëminently ahead of any other known plan for thoroughly and economically warming buildings. The cuts of the brick or portable furnaces will show at a glance to any intelligent mind the wonderful heating powers, — a cluster of tapering Radiators standing directly over the fire, must have over any other form of heating surface, and which is so constructed as to be perfectly gas and smoke tight. Any one in want of a furnace should not fail of thoroughly examining this furnace.

Special attention given to putting up Furnaces and Ranges, and the ventilation of buildings in every part of the country.

Nothing but what is strictly first-class work is manufactured by me.

Parlor, Office, and Store Stoves, Patent Dampers, Registers, Ventilators, etc.
Warerooms: 99 and 101 BLACKSTONE STREET, BOSTON.

Foundry at Mansfield, Mass.

GARDNER CHILSON.

THE ARLINGTON COOKING STOVE.

CHILSON'S NEW STOVE.—JUST COMPLETED.

Five minutes' examination of this stove will prove it to be the CHEAPEST, NEATEST, MOST CONVENIENT and DURABLE, and in EVERY RESPECT the BEST COOKING STOVE ever made. WITHOUT EXCEPTION, the WATER FRONT FIXTURES for heating water for BATH BOILERS, &c., are the MOST PERFECT EVER INVENTED. DO NOT FAIL to examine this stove before purchasing any other.

AVAILABILITY OF SIZES, with quantities of Cast-iron Tops, Registers, &c., for COAL, SOFT COAL, or WOOD, 1 1/2, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

CHILSON'S PATENT Elevated, Double-Oven COOKING RANGE

HAS BEEN REMODELLED AND IMPROVED.

This celebrated Range is universally acknowledged to be the neatest, highest and perfect Kitchen Range yet invented.

No housekeeper, who would enjoy the comforts of a really perfect Kitchen Range, should fail to examine this before purchasing. It is adapted for dwellings, hotels, &c., with or without water-backs, hot-baths, and hot-air fixtures for heating additional rooms.

It excels all others. —

1st — In its entirely new principle in circulating the heat around either oven separately, or both ovens, as desired.

2d — In its heavy, fine castings, and thorough workmanship.

3d — In its GREAT ECONOMY OF FUEL.

4th — In its quick and even baking evenness.

5th — In its self-regulating doors, without the usual complication of dampers; and finally, to its general beauty of design, durability, &c.

Nothing but what is strictly first class work is manufactured by me.

Also, Parlor, Office, and Store Stoves, Patent Dampers, Registers, Ventilators, Etc.

PROPRIETORS AND MANUFACTURERS OF

SWAIN'S TURBINE WATER WHEEL, LOWELL, MASS.

Fig. 1 is a perspective view of an Iron-Cased 18-inch Wheel, adapted

to a very high head. The Casing, G, contains the wheel and gate. From G rises the quarter turn which is to connect with the pent-stock, flume or fore-bay, from which the water is supplied for the wheel. This quarter turn also supports the gate-hoisting apparatus, consisting of the hand wheel A ; gear, B ; pinion, C ; rack, D ; gate rods, E ; and their packing boxes, F. F. These wheels are peculiarly adapted to mill sites subject to back water, or the flow of tides ; also, where the drought of summer reduces the flow of water to three-fourths, one-half, or even one-fourth the capacity of the wheel. For these purposes especially they are warranted superior to anything ever yet invented.

Manufacture to order Wool Washing-Machines, single, or in sets of three or four bowls. These Machines are warranted to cleanse all kinds of Wool. A Set of three Machines - two Washers and one Sizer - will clean Six Thousand Pounds of Wool in a day. For any other machines, Burring Machines for Wool-Cards, with Worker and Stripper combined on same. Metallic Waste Cards for Yarn and other soft wastes. Atomizer for oiling wool on Breaker Cards. - this is a new invention, and is giving entire satisfaction. It puts the oil or composition on to the wool on the feed-apron in the form of a mist or spray, making a large saving over oiling in the pile on the floor. [SEND FOR CIRCULAR.]

NOVELTY PLASTER WORKS,

LOWELL, MASS.

The only Manufactory in the
United States devoted wholly
to the Manufacture of Plas-
ters.

MANUFACTURE

Mitchell's Improved Medicated India Rubber Porous Plasters. Sure cure for all pains and aches in the body. Try one and be convinced.

Mitchell's Kid Strengthening Plasters. They are a good stimulant for all pains and lame backs. Some prefer them.

Mitchell's Corn Plasters. Patented. Sure cure for corns. So don't go limping around complaining of those painful corns, when for 25 cents you can procure a box of Mitchell's White Felt Medicated Corn Plasters. One box will convince the most skeptical of their merits.

Mitchell's Bunion Plasters. Same as the Corns, only larger, for Bunions and Swelled Joints; sure cure. Try a box. Only 25 cents.

Mitchell's Surgeons' Adhesive Plaster. Patented. Applied by moisture, and is always pliable, and does not irritate. Say, Doctor, just try it once, you that have never tried it, and you will never be without it. In wide sheets, and also ready cut and wound on small cylinders, and put up in cases for Doctor's use. Come and let us reason together, and go in for improvements, and not ride in old stage coaches any more, but jump on board the cars.

Mitchell's Pliable Isinglass Plaster. Patented. Is spread on the finest of silk, and is the best article of the kind known.

Mitchell's Court Plaster. Not stiff and irritating, but soft and pliable. Water-proof, assorted colors. For ladies and children, whose flesh is tender; they will find this to be just the thing for cuts, bruises, and scratches. Four pieces, assorted colors, in neat tablet, for 25 cents. Try one.

Mitchell's Improved Belladonna and Rubber Plaster. The introduction of the rubber keeps the plaster from drying up, or growing soft and running after being applied. Any doctor can have a sample sent free on application at the office. Once tried better appreciated.

Mitchell's Improved White Felt Lung Protectors. An old and true saying is, "An ounce of prevention is worth a pound of cure."

All of the above named goods, and others too numerous to mention, are labeled with a fac-simile of our factory. Take no others if you want a good article. None genuine unless labelled with a picture of the Novelty Plaster Works, on each box or package.

WALKER'S IMPROVED Portable Range.

This new Range excels anything of the kind ever before offered for sale. It requires much less space than ordinary cooking stoves, and is more economical. It will heat as much water as a range set in masonry.

The Hot Closet retains the heat usually radiated from the bottom, which is, during the summer months, worse than wasted, thereby not only saving fuel but making the Kitchen more comfortable, besides furnishing an admirable place for warming and keeping food warm, warming plates, etc. The door can be removed during cold weather to allow the heat to escape into the kitchen.

Coals are separated from the ashes in the Sifting Chamber.

The Folding Shelf, together with other improvements referred to, make it all we claim for it, viz: The most desirable Cooking Apparatus to be found anywhere.

For sale only by **JACOB NICHOLS, cor. Market and Dutton Sts., Lowell.**

TO BOOT & SHOE MANUFACTURERS.

We wish to call your attention to our method of

Drafting Sole Patterns.

One of the greatest difficulties encountered by the manufacturer is the imperfect manner in which Lasts and Dies run together. This could not be otherwise, owing to the fact that patterns have been graded by hand and on a principle differing from the last.

The machine we have in use will graduate Patterns on a perfect principle of proportion, both in length and width, and we can warrant every set graded by it. DIES MADE FROM THESE STANDARDS WILL EXACTLY CORRESPOND TO THE LASTS, thus enabling us to produce with accuracy results which have hitherto been but imperfectly produced.

We have also

Town's Last Machine and Patent Guides,

the best graduating machine in use, and we can assert and are prepared to demonstrate that all lasts made by us are more perfect in every respect than those from any other manufactory.

Owing to the fact that before the last is turned we make zinc patterns of the same sizes as the patterns by which the dies are made, and mould or crimp them to fit the bottom of the last, and then turn the last to fit the patterns, we can by this means ensure perfect fits and are enabled to give manufacturers the same lasts in width and fullness in two or three years thereafter as correctly as at the start.

We are also Agents for the manufacture of

McComber's Patent Lasts,

for Middlesex County, the best fitting Last made in this country. Application for license to use the same should be made to Joel McComber, 102 Washington Street, Boston.

CANNOT BE EQUALLED FOR**Economy in Water,****Perfection in Workmanship,****Durability and Power.**

The only Turbine adapted to variable streams. By the independent and simultaneous opening of the gates in sets, it adjusts the supply of water to the exact amount of work. The gates give a full opening under all circumstances, and are balanced by the action of the water itself; thus ensuring quick, positive, and easily-controlled gates under a high as well as a low head of water.

The guides are cast-steel, placed stationary between the wheel and gates at the true angle of hydraulic force, and are not varied by the movement of the gates, giving the water the most perfect direction on the buckets.
